# Central Use Cases and Main Actors

Main actors:

- Anonymous User
- Authenticated User
- Writer

Main use cases:

- Explore locations
- Participate in leaderboards
- Add location

# UI Design

# UI Design

# Custom AR Models

- Our app will integrate with Live2D and Artificial Reality to create an interactive 3D experience.

- We will build custom Live2D models and make custom animations.

- Users can visit locations to find unique creatures and treasures to collect.

- Show off your collections to other users through the global leaderboard list.

- See the messages posted by your predecessors.

Thank you
